Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/748,314

Applicant(s)

TSAL, MING FANG

Examiner

GARCIA ADE

Art Unit

3687

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☒ Information Disclosure Statement(s) (PTO/SF/ICE)
Paper No(s)/Mail Date 12/29/03.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner et al. [US 6,470,228 B1], in view of Chen et al. [US 2003/0126043 A1], and further in view of Sellers et al. [US 5,311,438].

As per claims 1-2, 4-9, Turner discloses a system for managing (10) material distribution and returned materials, the system comprising: a database for storing relevant data used or generated in implementing the system (device 20); and an application server (22) for managing material distribution and returned

Art Unit: 3687

materials by executing an inventory management program [see paragraph 50 of the detailed description of the invention, read as: ***processor 12 may also update inventory information 30 to reflect return of excess material areas 62 and 64 to inventory***]; transmitting material extraction information to an application server [via ***output 34*** that may also contain other information]; generating inventory variation information [via ***application 22*** that generates an order status update]; updating corresponding data records stored in a database [via ***processor 12*** that may update order information 24 using cost distribution 36].

Turner discloses all elements per claimed invention as explained above. Turner does not explicitly disclose the inventory management program comprising a material distribution management module for managing outgoing stocks that are to be distributed to different places, and a returned material management module for managing incoming stocks that are received from different places. However, Chen discloses the inventory management program comprising a material distribution management module for managing outgoing stocks that are to be distributed to different places, and a returned material management module for managing incoming stocks that are received from different places [see abstract, paragraph 4 (e.g. ***manage excess/surplus stock, etc.***), and paragraph 48 (e.g. ***material modules C, D, and E***)].

Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Turner to include Chen's material distribution management module for managing outgoing stocks. Such a modification would provide planning for production schedules after purchasing

Art Unit: 3687

material items, how to arrange delivery of finished goods , how to manage excess/surplus, outgoing stocks, and etc. [see paragraph 4].

As per claim 3, Turner discloses a user interface for receiving orders input by users, and for displaying results of implementation of said orders [see third paragraph of the detailed description of the invention]. Turner, further discloses a processor 12 that may comprises a computer, workstation, such as a UNIX workstation, mini-computer, mainframe or other **computing device** associated with a volatile or non-volatile memory 18, **input device 14**, and material management system 10 through output device 16, which may include **a display**, printer, or any other type of output device [see third paragraph of the detailed description of the invention]. Additionally, Turner discloses that computer systems are generally used in material management systems for tracking the material inventory throughout the manufacturing operations [see background of the invention].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The PTO 1449 form has been reviewed and considered.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GARCIA ADE whose telephone number is (571)272-5586. The examiner can normally be reached on M-F 8:30AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew S. Gart can be reached on 571.272.3955. The fax

Art Unit: 3687

phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
